

Resume Barry V. McCleary

Barry McCleary is founder, owner and CEO of Megazyme. He received his PhD and DSc degrees from the University of Sydney, at which he is an Adjunct Professor. His interests span enzymes and carbohydrates and how they interact in defining quality aspects and the processing of plant products including grain, fruits and biomass. Several methods developed by Barry have been adopted as international standards, including those for β -glucan, starch, fructan, dietary fibre and α -amylase. Dr McCleary has received several awards for his contributions to analytical chemistry including the prestigious Harvey Wiley Medal from AOAC International, The Phil Williams Applied Research Medal from AACC International, The Clive Bailey Medal from ICC and the Guthrie Medal from the Royal Australian Chemical Institute. Megazyme has won numerous innovation and business awards including Australian Small business of the year in 1993 and the Irish Small Business of the year in 2013.
